Department of Botany organized visit of T.Y. B. Sc. students has to seed processing unit at **Mahatma Phule Krishi Vidyapeeth** , Rahuri. (Tal- Rahuri, Dist- Ahmednagar) on 04/03/2022
Under guidance of Dr. S. B. Davange and Mr. S. S. Shinde.

Aim and objectives of Visit--

1. To know about the scope of seed Technology.
2. To know about the work in seed industries.
3. To know about information of Seed processing Unit, Seed Quality Control Unit, Research and Development

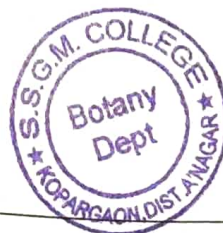

We visited in a various departments of Seed processing unit of Mahatma Phule Krishi Vidyapeeth Rahuri. First we visited vegetable seed processing unit, in that we saw that different types of instrument such as Seed cleaner, seed separator, bucket elevator, seed grader and collect the information through authorized persons of that department.

Seed cleaner-

Seed cleaner is the primary process of seed processing first inert matter such as straw, stones, weed seeds etc. are separate out from seeds. It is performed mostly by one machine known as air-screen cleaner. The air-screen machine is the basic cleaner in most seed processing plants. Almost all seed must be cleaned by air-screen cleaner before specific specifications can be attempted.

Seed separator-

Seeds are separate out through different sieves according to their size. Small seeds are pressed into the indents by centrifugal force and can be removed. The larger seeds flows in the Centre of the cylinder and is discharged by gravity. The magnetic separator separates seed according to its surface texture or related seed characteristics.

Seed grader-

Seed Grader is the machine used in Seed Processing Industry for Grading the Seed in different types of grades i.e Good Seed, Low Grade, Foreign Particles (wooden sticks, leaves of soybean plant), mud, Light Weight, Broken Seed and Undersized Seed.

Bucket type elevator-

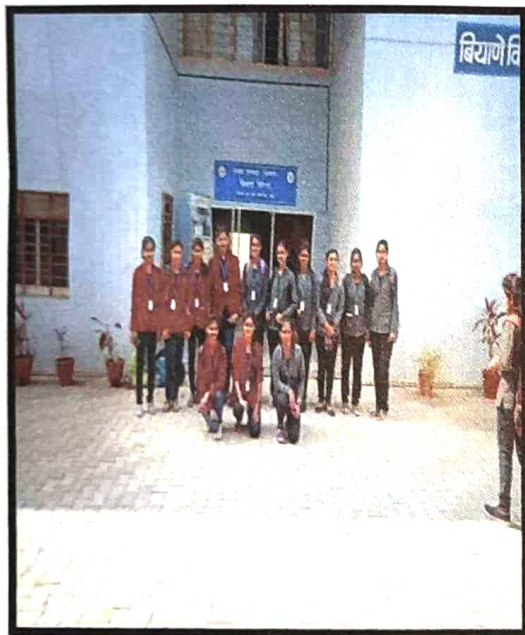

Bucket elevators are designed to move flowing seeds, pulses, cereals or bulk solids vertically. Bucket elevators use an endless belt or chain and have a series of buckets attached to it. Bulk material is spread in to an inlet hopper.

Seed storage godowns

Clean and hygienic godowns protect the seed from external insects and preserve the seed. Hence care should be taken in construction of godown. The points to be noted are as follows. Seed godown should be in a place where transport facilities are easily available.
